Planetary Mixer

The Semisolid Dosage Form Specialist

Gansons Planetary Mixer mixes, emulsifies, blends, de-aerates and distributes a wide variety of materials of different viscosities, textures and sizes. It can be used as a single pot processor in the production of materials ranging from cosmetic gels to toothpastes. It performs particularly well while handling high viscosity materials that are difficult to mix. Its main features are:

- Optional addition of high-speed homogenizer
- Provision for steam heating and cooling
- Easy retraction of mixing bowl for rapid and convenient cleaning
- Capability for vacuum applications
